2. It has great powers of endurance, so the power of its streams, the quanother States and foreign countries, as may

desire to make their homes in Wisconsin. We repel the thought, but it constantly forces itself upon us, that our legislators | the rain sets inhave not been wide awake to the great influence which a State Bureau of Agriculare and such reports would exert. Take any State North of us, and every year there is issued, by and under the authority chronicle the progress of the State in ma- way. terial advancement and development, Immigrants and inquiring persons find and read those that these reports diffuse goes on, widening, and spreading until it covers the land. of any of the counties in our State? Where is the record of their advantages? We talk our great natural wealth be known. There is no class of the community but would be benefitted by the establishment of such a Bureau. The farmer would be enabled to make known his wants and advertise his surplus lands. Professional men, by the influx of population, which has so long held undisputed sway would increase their business. Merchants,

mechanics, railroad men, would all feel a long since given up to the Bermuda. quickening vitality; and our old State, that relatively drops back further and further each decade in the race with other States, would bound forward-with fresh life and above its enemy, could be seen an isolated renewed activity. Now, the world knows that we have nearly 29,000,000 acres of land in our State; but it does not know that only about 6,000,- could be rooted out by this King grass in a 000 are in cultivation. The world knows few years in any locality, and would rewe have great mineral wealth, but we our commend it to be sown on such fields if for selves do not know precisely the spots where rial myself on one or two similar localities it lies; nor do we know the richness of our ores or the power of our streams. The world does not know that the average of our winters is only about 39 deg., and that our summers do not average above 75 deg.; nor tions in regard to protecting strawberry does it know that in our northern

limit we have 194 days between killing frosts. Our State is never spoken yet the flour manufactured from it were sure the ground would be well covered is preferred in every domestic and foreign market and commands a higher price than that made from wheat grown elsewhere. are developed profusely." The richest toanthropophagi of Central Africa, who, while sweltering beneath a blazing vertical sun smoke the fragrant Clarksville leaf. Let and then say whether the previous Legislatures have not touched everything but the

We have more faith in the members of our present Legislature. They are determined to practice a rigid economy; but we are greatly mistaken in the men, if they fail to put forth every effort to increase the value of taxable property in the State. In no way can this be done so cheaply, expeditionsly and efficiently as by the establishment of a Bureau in the interest of Agriculture, and through it promulgate to the wealth and rivers of affluence and valleys of opulence that spread all over the State.

BLIND STAGGERS IN PIGS.

To the Editors of the Union and American: FORT'S STATION, Robertson County, Tenn, Nov. 9, 1871.—Believing it the duty of every one engaged in agriculture, stock raising, etc. to report all successful experiments in that department, I avail myself f the present moment to commun brough your widely circulated and highly useful paper to all who may be interested, an experiment made by myself in the treatment of a disease in the pig known as blind staggers. A fine Essex pig which had been suffering with this disease was found lying in a ditch apparently lifeless; so far gone ins chapter 49 of the private acts of deed, as to be unable to resist handling or treatment. I considered him virtually dead. able gentleman of our county, recommended Hout's Rangum Root Liniment for thumps in the hog, I determined to try it in this disease, lind staggers. Having procured a bottle applied it well to the throat, chest and pine. In less than two hours the pig was drinking milk. I applied the remedy in the same manner the next day. If he ever had a spasm after the first application, I am not aware of it, and he is now one of the finest vere attacked and treated in like manner. Both are now well and in fine condition. 1 eport these experiments solely in the inerest of persons growing fine hogs, hoping that it may be the means of saving to them much that would otherwise be a total loss. A fifty-cent bottle saved to me thirty dol-JAS. H. MALLORY.

RENOVATING WORN LANDS. B. W. Jones, of Cottage Home, Surry, Va., furnishes Our Home Journal with the following plan for redeeming worn lands: "Seed down the land this full to rye, a planting your corn crop, turn under the ye with a heavy plow, and give the land a op-dressing of lime, forty or fifty bushels HOUSE BILLS ON THERD READING. to the acre. To re-establish the line between the counties of Carter and Sullivan. Amended and passed.

To corest that pertion of the revenue laws in reference to the assessment of bank gives, so the shares of stock shall be assessed and plant in cotton, corn, or anything else you like; for your land will be rich enough to carry any crop you desire.

And you have made it so by turning under the propose of the Pennsylvania Central is about to gobble up all the railroads in that section. In this connection the East Tennessee papers are apprehensive that the Pennsylvania Central is about to gobble up all the railroads in that section. In this connection the East Tennesseeun, published at Kingston, intimutes that it is the purpose of the Pennsylvania Central to place a line of steamers there crops of green manure in one year.

LESPEDESA STRIATA-JAPAN CLO-

YER; OR, KING GRASS. From the Athens (Ga.) Farmer and Artisan. In a recent number of your paper I see a piece taken from the Nashville UNION AND AMERICAN in reference to the Japan clover, or wild clover as it is familiarly called i We are in receipt of the Transactions of this region. While I think that piece is ar the Wisconsin State Agricultural Society, exacgeration in reference to some of its with tabular abstracts of the reports of County Agricultural Societies; special results of the reports of the reports of county Agricultural Societies; special results are some special results of the report of the report was been grown in this case.

1. It grows on poor land with more luxurom the United States census, illustrated riance than any other grass or weed I have with numerous engravings, and the whole ever seen; and as it has a small leaf, rather contravenes the general idea of vegetable physiologists, that large leaved plants feed and when we see the variety of information ever, that this deficiency is counteracted to t diffuses, and the substantial value of that a large extent by the number of leaves, for

not wonder at the industrial growth and far as the roots are concerned; but the branches and leaves will parch and the branches and leaves will parch and assertion that more may be learned of Wis-soon, especially where it grows sparsely. consin, its manufacturing and agricultural During a wet summer it luxuriates whereinterests and industries, the character, ever propagated on poor hill-sides as well ever propagated on poor hil seasons on thirsty lands, and I fear will not prove to be all we desire in such localities. tity of its timber, and indeed about It, however, reminds us of an anecdote of every thing that will interest or instruct a Mr. Dickson, when he was showing some practical man, than can be found in all the books in the world about Tennesse. This through a cornfield in which some of the volume is published to supply a useful stalks were actually dying for lack of moissource of information to such persons in ture, one of them called his attention to several in that condition. "Yes," said he, "I perceive the fact—but it dies game." And so of the Japan clover, it dies from severe drought, but rallies again as soon as

3. It is a good pasturage for stock, and I think would make good hay, if cut and cured. This I intend to test the present season. But I do not believe that our stock like it as well as the native grasses, and I doubt whether it is as nutritious as the Bermuda. As cattle love variety, however, of the State Legislature, volumes that this may subserve a good purpose in that way. My opinion, however, is, from not a very close observation in the matter, that they would soon tire out on it exclusively. It furnishes a large supply of vegetable matter to the soil, and I believe will prove reports. They in turn detail the substance to be the best humus making plant we have of them to others, and so the knowledge at the South, where so much is needed from our clean cotton culture. I intend to test the matter thoroughy the present winter in this way, and hope others will do the same. But where can any one get a proper idea As it is said to be difficult to gather the seed in large quantities, I intend to plow up the surface where it has seeded, and rake up the grass and top soil, and sow this dirt over of immigration, and meetings are held, and my oat and wheat fields, and especially on grand speeches are made, but we do not the poor places. My opinion is that a most take the pains, nor spare the means to let | luxuriant growth of this clover will follow, which can be turned under in the fall while green, and thus furnish not only humus

but nitrogen to the soil. 5. Another rare quality of this plant is indicated in the name I have given it-King over his circumscribed fields, cannot resist its encroaches. I have a bottom Recently I passed through it and found that the Lespedesa had almost completely throttled it, though like Mr. Dickson's corn, it died game, as here and there, peering sprig of Bermuda, which, as it cannot stand shade, will have to yield entirely before the close of another season. I have but little doubt that any pest like Coco or Bermuda no other purpose. I intend to give it a fair

E. M. PENDLETON. PROTECTING STRAWRERRIES. The editor of the Massachusetts Ploughnan makes the following excellent sugges-

vines during the winter: The object is not to prevent the ground from freezing, but to avoid subjecting the vines to the constant changes of winter, of as a wheat-growing section, and freezing and thawing alternately. If we with snow all winter we could get along without artificial protection. Now, almost any non-conducting substance which would answer for mulching in sum-In our climate it takes two months less time | mer will serve as a covering for the vines to grow it, while all the "nutritive elements | in winter, care being taken not to make the covering so thick as to smother the vines. Coarse, strawy manure is good, and so is bacco in the world is grown on our soils, salt hay and old meadow hay and straw. It is known everywhere, even among the The market gardeners most commonly use coarse hay which they rake off in the spring and stack up for another winter's use. But unless care is used with this substance, it will add grass and weed seed to the ber any one estimate our unknown advantages, and make a great deal of work which might be avoided. This is no objection where strawberries are grown on the annual system, as the plants are all turned under, one vital question-making known our reweeds and all, as soon as the crop is off, but on any other system it is a serious objec-

To avoid this many use leaves, spent tan, corn stalks, chopped straw or pine boughs. We incline to think leaves are about the best covering to be had, and where there are woods near at hand they are easily enough obtained. Pine leaves or pine needles as they are called, are most excellent. If other leaves, like those of the oak and other deciduous trees, are used, they are sure to blow off unless held in their place by pine or hemlock branches. We world a knowledge of the mountains of ering of two or three inches deep of pine leaves, the old matted layers that you find in pine forests half rotten with age. If the ds need manuring, coarse, light barnvard manure that is full of straw and other litter will do to apply. Solid barn-yard dung, the chances are that it would kill the

You want to put on the covering, whatever it is, before the ground has frozen very hard, and before the first heavy fall of snow. The latter part of November is ordinarily about the time to apply it. One advantage of using leaves is that a portion of them will settle in around the plant so as to make an excellent mulch for the bed, when the covering is removed in spring. This serves to keep the fruit free, from dirt, which for ome varieties is quite important. Capt. Moore, of Concord, uses hogs' bristles, we believe, for protecting his strawberries, and they improve the land very much. Any substance of a similar character that can be Having noticed that Mr. J. E. Bell, a very re- had with the least expense of time and trouble will answer the purpose.

## TENNESSEE NEWS.

The new Odd Fellows' Hall at Franklin is nearly completed, and will be a handsome milding. Thomas W. Bullock has been elected Mayor of Franklin; Wm. House, Recorder; J. M. Nichol, City Marshal; and E. B. Cayce, Frank Wells, said to be from Memphis,

nd implicated in the killing of two men in Memphis a year ago, has been arrested at Baker Brady, a well known, but not very ighly esteemed, citizen of Murfreesboro, died a few days since of apoplexy, caused

by dissipation.

The Enterprise is the name of a paper, the publication of which has just been comred at Bartlett by Messrs. Shotwell & Priddy. It shows good style and ability. The prisoners in the Murfreesbero ja lately made an unsuccessful attempt to escape from that institution. It is supposed that a horse thief named Robertson was the eading spirit in this effort for liberty. Thomas Caldwell, the criminal who was badly wounded at Old Linnville a few days

since by a sheriff posse who were endeavor-A little daughter of Mr. Alexander Me. evening, Nov. 7, by her clothes taking fire

And you have made it so by turning under three crops of green manure in one year.

I reckon this is about as quick and cheap a way of reclaiming poor fields as you can invent. After some discussion the bill was rejected.

Adjumed until 10 o'clock Monday.

And you have made it so by turning under three crops of green manure in one year. I reckon this is about as quick and cheap a way of reclaiming poor fields as you can invent. If there is a better I want to hear of it."

Sylvania Central to place a line of steamers on the Tennessee river, at an early day, to run between London and Decalur, Ala., making close connections with the trains at London, thus controlling all the freight and travel along the rivers.

Havana Markets. From Messrs. Zaldo & Co.'s market review for he week ending on the 28th of October the fol-owing is taken: There has been quite a bull in the demand for There has been quite a lull in the demand for sugar since our last, and in consequence we have to report a very quiet market this week.

The transactions have been limited to a few thousand boxes clayed on basis of 10 to 10 gr for No. 12 and 15r for whites. Some 1,500 boxes mulasses sugar, Nos. 7 to 9 at 7 to 7 gr; 150 boxes mulasses sugar, Nos. 8 to 9 at 10 to 10 gr, and 180 boxes ditto, No. 9 at 9r; 150 hogsheads superior quality Melado at 7r and a couple of hundred hogsheads Muscovadoes, price not reported.

Of the quantity of sugar offered for sale by auction last Saturday afternoom—to which we alluded in our previous review—only about oneauction last Saturday afternoon—to which we alluded in our previous review—only about one-half was sold, principally clayed, of the lower numbers at about current quotations.

The parcel of 1,806 boxes derosnes among them, after being offered twice, has been withdrawn from market pro tem, the final offer of 10r, and \$101 extra not being acceptable to the holder. One or two other lots of sugar, announced for sale by auction this week, have also been withdrawn.

lrawn.

The clearances during the week amount to 1,000 boxes to the United States, 500 boxes and 50 pipes rum to Spain, and our stock is accordingly further reduced to 140,000 boxes and 600 From the outports there is very little news of interest at present. At St. Jago de Cuba, 21st inst., the protracted drought had considerably retarded and injured the growing cane, and in the absence of rain very short crops were being anticipated both at St. Jago and Guantanamo.

Our Leading Exports. The exports of domestic products from the United States during the fiscal year ending June 30, 1871, amounted in the aggregate to \$554,658,752. A statement of the value of the leading articles comprising this aggregate will be of it The exports of cotton and cotton fabrics amounted to \$221,885,245. This item alone is within twenty millions of half of the datiable im-

orts for the year.

Leaf and manufactured tobacco to the amount S21,995,967 was exported. The exports of wheat, corn, rye, oats, barley The exports of gold and sliver, in coin, bullion, leaf and jewelry, amounted to \$84,422,039.

Tar, pitch, rosin, spirits turpentine and crude turpentine were exported to the amount of \$2,-131,442.

turpentine were exported to the amount of \$2,703,943.

Coal oil, crude and refined petroleum, benzine, animal oils, whale, fish, castor and linesed oils were exported to the amount of \$38,313,300, of which one item, refined petroleum, gave more that thirty-four millions.

The bacon, beef, butter, cheese, fish, land, pre-The bacon, beef, butter, cheese, fish, lard, preserved meats, oysters, pork, vegetables, plokles, and sauces which were exported amounted to \$38,845,130. The chief items of animal food formished by the United States to foreigners were, bacon, (\$8,136,983) 71,446,554 pointds; beef, (\$3,25,696) 33,889,217 pounds; cheese, (\$8,732,989) (36,698,837 pounds; lard, (\$10,587,029) 89,637,237 pounds; pork, (\$4,302,329) 39,250,759 pounds.

The exports of tallow amounted to \$3,859,317 pounds, worth \$5,925,035.

The immber and woodenware exported were valued at \$12,216,512. The largest item under this class of exports was staves, headings, etc., to the value of \$4,822,795. The boards, scantlings, deals, joists and planks measured 154,600,090 deals, joists and planks measured 154,600,090

the value of \$4.822,705. The boards, scantlings, deals, joists and planks measured 154,630,050 feet, and were worth \$2,764,329. The exports of dicade amounted to \$4,150,021. The entire exports of domëstic products, including the foregoing, were in value within eight millions of the total imports and about fifty millions more than all the imports which paid a duty.

New York Shipping and Commercial List. The Supply of Meat.

During the war the destruction of live stock was very great, particularly in the Southern States, and the small crop of cereals in the West, States, and the small crop of cereals in the West, and consequent high range of prices, tending to retard stock raising. The supply of meat food, therefore, ran short for several years after the war, and the beef and hog products brought in the market enormous figures. For a time it seemed that the consumption of meat food had reached such a point it would be impossible for the supply to be brought up to the demand.

Year after year the hog crop fell short, and to fill the vacuum, the vast herds of Texas eattle were drawn upon so liberally that there were ere drawn upon so liberally that there were sars that even that prolific State would be drained of its live stock. As it is, Texas has not at present, probably, more than half the number of cattle she had when the war closed, and the price per head is fully double what it was then.

Within the last two years the fine crops of grain in the West, and the cumparatively low prices which it has commanded, have had the effect of bringing the supply of meat food nearly, if not quite, up to the requirements.

Grain is easily converted into flesh and fat, and a disproportion in the values of animal and vegitable food soon regulates itself. With a magnificent corn crop, therefore, last year, the meat turned out one of the largest hog crops on record, and pork and bason have since then railed low.

The decline in log meats necessarily depressed the value of other meats, and during the last year the people have been fed even more cheaply than before the war.

The indications are favorable for a continued plentiful supply of meat. The returns from several of the late twent westerned. ed of its live stock. As it is, Texas has not at

entiful supply of meat. The returns from sev-ral of the largest Western States show a large

crai of the largest Western States show a large increase in the number of long ever last year, and the number of beef cattle and sheep is also in-creasing. The number of Texas cattle being driven North is steadily decreasing, and the local packeries are not slaughtering to the same extent as formerly. The vast cattle hive will have tim-now to recuperate and bring up her reserve to its former limit.

The Corn Crop.

The corn crop of the West, the present season, has proved the best harvested for years. In many portions of Indiana, Iowa, Missouri, Nebraska and Minnesota, corn is offered in the cribs at from ten to fifteen cents a bushel. In Hilmois and Kentucky the yield has been beyond all precedent. The wheat crop has also been very large. In Europs, on the contrary, there appears to have been a heavy defleit in the grain harvests in nearly all countries. In England the general falling off has been variously estimated at from fifteen to twenty per cent, while in Hungary, the Danubhan principalities, portions of Austria, and in Southern Russia—all countries that have usually exported large quantities of grain—there has been a great decrease from the average production. The ravages of the potato rot and the cattle disease in Great Britain will increase the demand for grain and animal food, and the United States will be able to supply both in any quantity at reasonable prices, as cheap bacon and pots, articles extensively consumed everywhere, are the natural consequence of cheap corn.

New York Money Market.

New York, Nov. 19.—Gold depressed by the advance of American securities in London, and opened at 1118, sold down to 1118 and closed at 1118, S1114. Loans were made at from 2 to 6 per cent. for carrying. Clearings \$25,000,000. Governments firm in tone, though prices at one time during the day were lower than resterday in sympathy with gold, but at the close the market was strong and higher. Stocks opened irregular and weak, but towards noon became strong, and at the close wore heavy and lower. Northwestern were the weakest, selling down nearly 1 per cent. from prices at 2 p. st. The chief dealings were in New York Central, Long Johand, Wahash, Northwest Common, Rock Island and Western Union. Lake Shore closed at 1048204k dividend; on 8 to 85k ex-dividend, and 78 k to 15 for scrip. The depression was caused in part by the report that a Southern railroad company had gone to protest on its paper; No particulars. New York Money Market. the report that a Southern railroad company had gone to protest on its paper; No particulars. The failure of a small dry goods firm is announced. For some days past vague rumors have been aftent on the street to the effect that the Chicago and Rock Island Company intended to issue two million dollars of new stock. To-day these rumors were denied by the Directors. Money steady at 550 per cent. Southern secrities, on last call were firmer in leading bonds. Sterling Exchange—Bank bills 1984; U. S. Coupons 1881, 1164; 5-29 '82, 1114; do '64, 1114; do '68, 1114; do '68, 1144; do usew, filsy; ourroncy 68, filsy, Missouri bonds 95, Tennessee, old, 66; do new, 66;; Virginia, new, 68; do old, 60; North Carolina, old, 364; do new, 194.

New York Dry Goods Market. ecember 18 gc. Livenpool, Nov. 18, 5:00.—Cotton unchanged.

New York Dry Goods Market, New York Dry Goods Market.

New York, Nov. 16.—There is a moderate business doing in seasonable goods at reasonably
steady rates, but the general market is inactive.
The extreme prices prevailing for new materials
however has a tendency to lower the market for
piece goods. Wool is very scarce and prices on
the rise. No. I and extra fleeces command 606
65c. Cottod is a little weak, but it is thought the
crop will not be abundant enough this year to
cause much if any reduction in prices. White
Sea Island is very scarce and twenty cents per San Island is very scarce and twenty cents per lb. higher than fast year; but little can be ob-tained now below See, hence the firmness of the market for 6-cord speed thread. White 3-cord meets with only a limited demand. Woolen goods are bringing better prices than recently, and all staple cottons are in limited request at steady rates.

ands are now suffering from biliousness, indigestion, constipation, periodical fevers, general debility and nervons affections, who might be restored to perfect health within a month or less by the use of Hostetter's Stomach Bitters. The multitudes who have been cured of these and other aliments by the use of this well known specific are always ready to testify to its virtue. specific are always ready to testify to its virtue is a preventive and remedy. They are spread over the whole country, they are eager to praise and recommend it; and yet, notwithstanding its vast popularity, there are many invalids, and many who are continually exposed to the epidemical diseases, against which it is a sure protection, who either through indifference or incredulity neglect to seize the opportunity to cure and means of prevention, which they have only to reach out their hands to obtain. This is strange; t is one of the anomalies of human nature which t is impossible to account for or explain. It is, however, quite certain that every day the numper of these Martyrs of Neglect is diminishing This is proved by the statistics of the sales of the her of these Martyrs of Neglect is diminishing.
This is proved by the statistics of the sales of the
great remedy. During the present fall the demand for it has increased beyond all precedent,
and it seems as if in the end the entire community would realize the important fact, that when
all other medicines prescribed for the above complaints fail, it can and does effect a cure. As a
protection against the diseases most common at
this senson, there is nothing commandle with it.

JOHN DUNCAN'S SONS,

'IT SAVED MY LIFE." Words of a Reliable Druggist

WHAT IS THE VALUE OF MONEY WHEN COMPARED TO HEALTH.

ALLEN'S LUNG BALSAM Is warranted to break up the most troubles Cough in an incredibly short time. There is no rumedy that can show more evidence of real merit than this BALSAM for curing Consump-tion, Coughs, Colds, Asthma, Croup, etc.

IT ACTS ON THE KIDNEYS, IT ACTS ON THE LIVER, By Which makes it more than a Cough Remedy.

gar Read the following from a reliable Druggist of Michigan:

Marine Civy, Mion., July 27, 1876.—J. N.
Harris & Co. Dear Sirs: The Allen's Lung Baisam has arrived. I would not like to be without
it, for it has saved my life. I took a bad cold and
cough, and finally Consumption was seated upon
me. I was in a very bad state. I tried every
thing that was recommended, and such a great me. I was in a very bad state. I tried every thing that was recommended, and spent a great deal of money, and got no help. I had the Allen's Lung Baisam for sale, but I knew nothing of its merits. I did not like to take it, without knowing more about it. I had not sold a bottle. When your agent called on me I told him I could not sell a medicine I knew nothing about. He urged me to try it myself. I did so, and to my grateful surprise the first bottle stopped my cough, and before the third bottle was taken in lungs were healed and well, and I can now speak knowingly to my friends and customers of the qualities of Allen's Lung Baisam. I remain respectfully,

It is harmless to the most delicate child. It contains no Opium m any form.

It is sold by Medicine Dealers generally.

CONSUMPTION.

ITS CURE AND ITS PREVENTIVE. By J. H. SCHENCE, M. D. Many a human being has passed away for whose death there was no other reason than the neglect of known and indispitably proven, means of cure. Those rear and dear to family and friends are sleeping the dreambess slamber into which, had they calmly adopted DR. JOSEPH H. SCHENCE'S SIMPLE TREATMENT, DR. JOSEPH H. ACHENCE'S SIMPLE
and availed themselves of his wonderfully efficacious medicines, they would not have failen.
Dr. Schenck has in his own case proved that
wherever sufficient vitality remains, that vitality,
by his medicines and his directions for their use, is
galaxened into healthful vigor.

In this stansement linere is nothing presumptuous.
To the fails of the invalid is made no representation
that is not a thousand times substantiated by living
and visible works. The theory of the cure by Dr.
Schenck's medicines is as simple as it is unfailing.
Its philosophy requires no argument. It is softensuring, self-convincing.

The Sex-west Tonic and Mandrake Pills are
first two weapons with which the citadet of the
maindy is assailed. Two-thirds of the cases of contemption originate in dystepsia and a functionally
disordered liver. With the condition the brooking
tuess "sympathies" with the knomest. They respond to the morbific action of the liver. Herethen with all he dist

The Mandrake Pills are com-

A SUPPLY OF GOOD BLOOD, to itself that he is ceitifue, at last,

A SIPPLY OF GEOD BLOOD.

The Sea-weed Toxic, in conjunction with the Pills, permeates and assimilates with the Root. Chyfill-indion is now progressing without its previous fortures. Digestion becomes paintiest, and the curs is seen to be at hand. There is no more flatnitence, no sensorbation of the stomach. An appetite sets in. Now comes the president Blood Purifier ever yet given by an indulgent father to suffering man. Now comes the president Blood Purifier ever yet given by an indulgent father to suffering man is functions and to hasten and complete the curse. It enters at once upon its work. Nature can not be chested. It collects and ripera the impaleed and discassed portice of the lungs. In the form of guilerings, it prepares them for expectors into, and let in a very short time the malady is vanquished, the rotten through that it occupied is renovated and made new, and the patient, in all the dignity of regained vigor, steps forth to enjoy the maniscod of womanhood that was

The Martyrs of Neglect.

It is not too much to say that tens of thousands are now suffering from billiousness, indigestion, constipation, periodical fevers, general devery Salurday from \$5 at. to 3 r.m. Those who wish a bornound examination with the Respiro-

taken in increased doses; the three medicines need no other accompaniments than the ample instructions that accompany them: First create appetite. Of returning health, hunger is the most velcome symptom. When it comes, as it will come, let the despairing at once be of good cheer. Good blood at once follows, the cough lowers, the night-sweat is abuted. If a short-time both of these morbid symptoms are gone forever.

Br. Schedok's medicines are constantly kept it, lens of shousands of families. As a taxative or purgative, the Mandrake Fills are a standard preparation; while the Philmonic Syrup, as a cursed coughs and colds, may be regarded as a prophylacteric against consumption in any of its forms.

Price of the Pulmonic Syrup, as See weed Tonic.
